

# ASX Announcement: 5GN launches national Data Network to meet demand driven by digital transformation.

NEWS RELEASE 21<sup>st</sup> March 2019

## Highlights

- 5GN completes MPLS backbone spanning capital cities of Australia.
- Secure and private access to existing Cloud, Hosting and Managed Services with seamless connectivity to all 5GN Data Centres.
- Fully operational data network with dedicated speeds up to 10GB.

5G Networks (ASX:5GN, the Company) is pleased to announce the official launch of its nationwide high-speed Managed Data Network (MPLS) to the Australian market.

Highlighted as a clear strategy since the ASX listing in November 2017, the launch of a nationwide MPLS network marks a significant milestone for the Company and its continued strategic execution. The national network allows 5GN to extend its fibre and wireless network to its customer base with controlled capital expenditure, swapping out third party services with its own network.

The Company remains focussed on the growth of its data network services by augmenting and integrating the existing 5GN fibre and fixed wireless networks. The fully operational data network with dedicated speeds up to 10GB to customers will mesh secure and private access to existing Cloud, Hosting and Managed Services with seamless connectivity to all 5GN Data Centres.

### 5G Networks Managing Director Joe Demase stated;

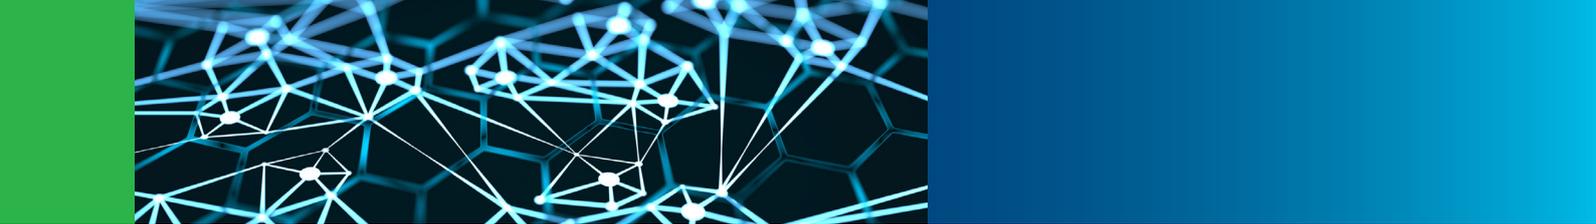

*"Today marks an exciting day for 5GN, our customers and shareholders. We are proud to have built a fully operational network, with an MPLS backbone spanning coast to coast. Importantly, we are continuing to invest in infrastructure to deliver our commitment of seamless digital services for our customers. We are also proud that this network is underpinned by a well-recognised heritage of market leading engineering expertise coupled with Australian based service support."*

The fully operational network will enable 5GN to drive continued growth of revenue and EBITDA by accelerating the current data network revenue growth rate of 112% (FY18H2 to FY19H1), in addition to reducing reliance on third party network providers.

### Garry White, 5GN National Sales Director says;

*"It's not just about going live today. It's about having the strengthened capability as a key partner in supporting the digital transformation of our customers. We also recognise that growing demand for managed network connectivity needs to be supported by flexibility, diversity and choice, combined with localised support. 5GN are committed to providing that for our current and future customers."*

5GN's commitment to infrastructure investment is a critical formula to achieving long-term business success as Australian businesses continue to adopt innovative digital technologies. This transformation drives increased demand for high speed, secure and reliable business connectivity.

## About 5G Networks

5G Networks (5GN) is a licenced telecommunications carrier operating across Australia. Our vision is to be Australia's provider of choice for unifying a seamless digital experience for our customers across data connectivity, cloud and managed services in the business to business market.

As an organisation, we are dedicated and passionate about delivering unique value to our 2000+ customers which include several top 50 ASX listed and Government organisations. This commitment is strengthened by a core focus on digital leadership, innovation and an exceptional customer experience.

5G Networks currently owns and operates its own National high-speed Data Network with points of presence in all major Australian capital cities. In addition, the Company offers managed cloud solutions through its Cloud and Data Centre capabilities as well as Managed services to optimise customers' IT and network environments.
